Welcome to the future of mixer taps.
The new BLANCO Smart mixer taps.
Welcome to the future of kitchen mixer taps! BLANCO is entering a new era with its innovative range of Smart mixer taps. The smart product range is geared towards highly specific uses within the kitchen. To put it another way, each of the four mixer taps helps to solve a different everyday problem.

The BLANCO EVOL-S Volume is impressive because of its exact measuring cup function, ensuring accurate water volume. There’s no need to wait around for the water to finally boil with the BLANCO TAMPERA Hot*: the hot water function gets boiling hot water flowing immediately on request. With its integrated limescale-reducing filter, the BLANCO FONTAS-S II Filter promises superior water quality and is quick to impress those who appreciate good taste. You can taste the superior quality of the water.

*This model is not available in all markets.
And then there’s the BLANCO SOLENTA-S Senso with its integrated motion sensor for touchless water flow, which makes operating the mixer tap easy even when your hands are full.

Four modern, future-proof mixer taps that provide perfect solutions for everyday use in the kitchen. Four distinctive beacons of outstanding quality that demand a place in your kitchen. It doesn’t get smarter than that.
Smart inventions.
An array of functions.
Countless applications.
Smart mixer taps make your everyday that bit easier.

**BLANCO EVOL-S Volume**
Do you always want just the amount of water that you need? The integrated measuring cup function makes it easy.

**BLANCO TAMPERA Hot**
Do you want running boiling water in an instant? The hot water function makes it easy.
BLANCO SOLENTA-S Senso
Do you want running water, even if both of your hands are full? The contactless sensor technology and start-stop function make it easy.

BLANCO FONTAS-S II Filter
Do you want water with less scale and more taste? The filter function makes it easy.
Perfection is everything working precisely.
Like the EVOL-S Volume from BLANCO. Thanks to its integrated measuring cup function, the EVOL-S Volume always provides exactly the amount of water that you need, which can be set precisely using the rotary control and intuitive touch operation. Whether you’re preparing pizza dough, mixing jelly or making ice, the EVOL-S Volume from BLANCO is the perfect Smart mixer tap for when you need a precise amount of water.

Another plus is that using a specific amount of water puts an end to unnecessary wasting of water, making this mixer tap economical and environmentally friendly. The new dynamic flow control system provides intelligent control of the water flow: the greater the amount of water you want, the more powerful the jet and the faster the water flow. This means no unnecessary waiting.

EVOL-S Volume is available in chrome and stainless finish UltraResist surface materials, as well as in right- and left-lever versions so that you have the perfect configuration for your sink bowl arrangement. Simply superb.
Always get the exact amount of water with the BLANCO EVOL-S Volume.
Easy to adjust.
Tap once.
Millilitre precision.

Use the scaling wheel to set the exact amount of water that you want to come out of the tap, in small increments from 100 ml to 5 litres.

Intuitive touch control: Tap on the left-hand lever and the set amount of water comes out of the mixer tap.

Use the second lever to mix cold and warm water in the usual way and have it flowing continuously.
In a high-quality metal finish, the pull-out spout gives you more freedom of movement around the sink.

Dynamic Flow Control: The more water you need, the faster it flows through the pipe. And you’ll be done quicker, too.

For precision cooks.
For those who love accuracy.
For water savers.
You use your mixer tap more than any other piece of equipment in your kitchen. With the BLANCO Smart mixer tap EVOL-S Volume you can widen the possibilities of this kitchen hero. More than just mixing cold and warm, you can draw exactly the amount that you need at a given moment. Precise, perfect and in a timeless contemporary design. One small step for mankind. A big step towards perfecting everyday kitchen tasks.

You’ll always have the exact volume of water that you need, even if it’s the tiniest amount, e.g. when making popsicles.

Superbly measured. Superbly precise. Superb pizza dough.

Your chia seed pudding will come out perfectly thanks to the integrated measuring cup function.

The EVOL-S Volume allows you to set the amount of water to exactly what you need. No more, and no less.

Keeping everyone happy, the measuring cup wheel lets you set the amount of water precisely.

Economical and environmentally friendly: no more water wastage thanks to exact water consumption.
One innovation.  
Eighteen settings.  
Countless uses.
BLANCO EVOL-S Volume, lever right, stainless finish UltraResist.
Whether you want to pour fresh tea, brew some coffee, blanch vegetables or fill up your hot-water bottle, if you want to boil some water, you usually have to wait. But no longer! Now you have the smart BLANCO TAMPERA Hot* 3-in-1 mixer tap instead. 3-in-1 means cold, warm and instant boiling water from a single mixer tap.

Having boiling water on-tap without having to wait is a real advantage and saves valuable time. The mixer tap is controlled via a separate hot water rotary knob with a safety catch. After every use, the rotary knob springs straight back to the original position, ensuring maximum safety.

The boiling water comes from a 4 litre-capacity hot water boiler made of extremely resistant, taste-neutral, hygienic titanium. The water in the boiler is heated to 105 °C to ensure that bacteria and germs are thoroughly eliminated.

Before heating, the water is purified with a high-quality BWT multi-stage filter. The filter reduces limescale and contaminants and improves both the water quality and the taste. In addition, the mixer tap also dispenses warm and cold unfiltered water in the normal way. The hot water system also works perfectly in combination with the BLANCO SELECT Compact 60/2 waste management system.

The BLANCO TAMPERA Hot – a cool, smart invention that makes everyday life that bit easier.

*This model is not available in all markets.
Safe even for little ones: hot water flows only when the knob is touched and turned at the same time.

Safety first: as soon as you release the rotary knob, it springs straight back to the original position and the water stops flowing.

The insulated spout and the concentrated, low-spray jet of water protect your hands from the hot water.
The system offers enough room to combine it with the BLANCO SELECT Compact 60/2 waste management system.

The smart mixer tap can be retrofitted into existing kitchens. The titanium boiler and filter are hidden away in the base cabinet.

One touch of a button. One turn. Boiling hot in an instant.

The 3-in-1 mixer tap with a rotary knob for boiling hot water and a mixer lever for warm and cold water.
No need to boil water.
No need to wait.
Always a pleasure.
Is waiting around impatiently for hot water to be ready really necessary in this day and age? Be smart and save yourself all that. The TAMPERA Hot by BLANCO will give you valuable extra space on your worktop, not to mention freeing up precious time for the important things in life.

Tea on tap: the water in the hot water boiler is heated to a constant 105 °C and comes out of the mixer tap at almost 100 °C.

Get your coffee fix without having to wait – made possible by the TAMPERA Hot from the Smart mixer taps range.

Blanch vegetables in an instant – the boiling water comes out of a hot water boiler made of resistant titanium.

No need to wait around for delicious food: cook pasta or quinoa the easy way thanks to the extra hot water rotary knob.

Fill up your hot water bottle without having to boil the kettle and save on your energy consumption.
The tap flows up above.
The hard work happens down below.
All for your pleasure.
The BLANCO TAMPERA Hot Smart mixer tap has a lot of advanced technology working away in the background.
The Flowmeter display shows you how much water the filter is still able to purify and descale, in the form of a countdown.

To ensure that you always change the filter at exactly the right time, the BLANCO Flowmeter is built into the water pipe for the filter and measures precisely how much water is actually flowing through the filter. Depending on the hardness of your water, the Flowmeter will show the filter’s exact remaining capacity. That way, you can be sure that you are getting the best out of the filter.

If the filter needs to be changed, the Flowmeter will warn you in good time by sounding a signal. It also gives you a warning if its batteries need to be changed. This gives you complete peace of mind when getting boiling water. The Flowmeter automatically lets you know if the system needs something.

The Flowmeter is built into the water pipe for the filter and measures precisely how much water is actually flowing through the filter. Depending on the hardness of your water, the Flowmeter will show the filter’s exact remaining capacity. That way, you can be sure that you are getting the best out of the filter.

There is enough space in the cabinet for a waste management system: combining it with the BLANCO SELECT Compact 60/2 is ideal as it allows you to make the most of the remaining space.

The BWT multi-stage filter is easy to replace: simply unscrew the old filter and screw in the new one. Done.

Hot water now tastes better than ever with the BWT multi-stage filter: before heating, this innovative, high-performance filter purifies the water from the pipe several times, getting rid of minute particles that affect the taste. The integrated activated carbon filter reduces the chlorine content, giving the boiling hot water an even better taste. The high-performance ion exchanger reduces heavy metals that could contaminate your hot water. And last but not least, it significantly reduces the water hardness. This protects the high-quality titanium boiler from deposits, so your morning tea or coffee will never again be marred by traces of limescale.

The result: the BLANCO Smart mixer tap transforms standard hot water into delicious soft, freshly boiled drinking water of the very highest quality. Simply delicious.

High-tech in the cabinet: Future-proof technology is hidden away in your cabinet so that you can get hot water straight away from your BLANCO Smart mixer tap. The high-pressure boiler is made of top-quality titanium. This high-grade material is corrosion-resistant and taste-neutral – after all, it is constantly heating water to 105°C. This high temperature within the boiler ensures that the water is boiling hot when it comes out of the mixer tap. It contains around 2.5 litres of boiling hot water, ready for use.

The titanium boiler is vertically mounted on the floor of the cabinet and can also be retrofitted into your kitchen.

The BWT multi-stage filter is easy to replace: simply unscrew the old filter and screw in the new one. Done.

Having boiling hot water on tap at any time is not only practical, it also saves time, water and power. A full kettle takes around four minutes to bring water to a boil. You save those four minutes every time you get hot water from your BLANCO TAMPERA Hot Smart mixer tap. How much time do you spend waiting for your kettle to boil every day? When it’s every day of every week of every month it equates to a lot of time that you can use more productively from now on. What’s more, you can also save water, as with the Smart mixer tap you get exactly the amount that you need, so you’re not heating excess water in the kettle. Finally, the TAMPERA Hot boasts a positive energy balance in the direct comparison, as the titanium boiler takes far less time than a kettle to heat up the same amount of water.
**Smart benefits at a glance:**
- up to 2.5 litres of boiling hot, filtered water instantly
- Resistant titanium boiler with a total 4-litre capacity
- Power consumption in operating mode: 2,100 W
- Energy-efficient: Power consumption in stand-by mode approx. 16 W

- Includes top-quality BWT multi-stage filter
- Flowmeter with real-time filter capacity display
- Heating time when boiler has just been filled: approx. 15 minutes

**BLANCO TAMPERA Hot compared with its rivals:**
how much time do you actually save? The BLANCO Smart mixer tap leaves conventional kettles in the shade when they are compared with one another.

Five minutes a day.
30 minutes a week.
A whole day every year.
Is there anything better than being given more time?
A fresh drink of water can be utterly delicious!
When you're really thirsty, there's nothing better. And when you're making tea, putting together your own bottled water or using ice cubes, you want to know that you have high-quality water you can rely on.

That's where the Smart mixer taps BLANCO FONTAS-S II Filter, FONTAS II Filter and TRIMA Filter really come into their own. An integrated BWT multi-stage filter purifies the water, reduces limescale and heavy metal content and thus appreciably enhances the taste. BLANCO filter systems provide three options: warm, cold and filtered cold water. A single mixer tap does all 3 in 1. It's the ultimate in smartness.

The two separate control levers for cold and warm water on the right-hand side and the control lever for filtered water on the left-hand side ensure that you can always get exactly the type of water that you want at any given moment. BLANCO filter systems: choice brings pleasure.

In addition, the high filtering capacity extends the usage intervals, while the filter cartridges do not have to be changed as often, which in turn saves money.

The BLANCO FONTAS-S II Filter is also notable for its pull-out spout for warm and cold water and filtered water. This spout allows flexible use around the sink, making it easy to fill household appliances like your kettle or coffee machine reservoir with filtered water. A fresh solution that tastes great.

Filtered water.
A better taste.
The perfect solution.
Less limescale, more taste: BLANCO Filter systems make water delicious.
Filtered water. A better taste. The perfect solution.
Filtered drinking water flows straight from the mixer tap in an instant. Simply delicious.

Filtered and unfiltered tap water flows completely separately through the pipes and the spout. There’s no risk of them getting mixed together.

On the one side you get filtered, purified water, and on the other unfiltered warm and cold mains water.
FONTAS-S II: the only filter mixer tap with a pull-out spout, providing plenty of room for manoeuvre around the sink.

The FONTAS-S II Filter and FONTAS II Filter are available in chrome and stainless finish UltraResist.

The filtering system is also available with a C-spout as the BLANCO TRIMA Filter.
For coffee aficionados.
For tea connoisseurs.
For water lovers.
One thing is clear: water with less calcium content simply tastes better. Limescale-reduced water from the FONTAS-S II Filter is also good news for your coffee machine.

The BWT multi-stage filter gives a clear taste improvement, even for ice cubes.

Whether you love tea, coffee or water, you can taste the superb quality of the limescale-reduced water.

No more dragging heavy pallets of water around: thanks to the FONTAS-S II Filter, purified tap water makes a smart alternative.

BLANCO’s filtering systems reduce not only the limescale content, but also the amount of heavy metals and chlorine. Plain old tap water is transformed into deliciously purified, fresh drinking water. Your body will thank you. No more flakes in your cup of tea. Limescale build-up in coffee machines, kettles and other kitchen appliances is also massively reduced. This will lengthen your life and save you lots of laborious cleaning. BLANCO FONTAS-S II Filter, FONTAS II Filter and TRIMA Filter: Smart solutions to enrich your kitchen experience.
Better water quality thanks to the multi-stage filtering technology.

The multi-stage filter from BWT turns mains water into an utter delight.
This innovative, high-performance filter purifies the water from the pipe several times, getting rid of minute particles that affect the taste. The integrated activated carbon filter reduces the chlorine content, giving the water an even better taste. The high-performance ion exchanger reduces any heavy metal content contaminating your drinking water. And last but not least, it significantly reduces the water hardness. This means less limescale in coffee machines, kettles and other kitchen appliances, which can extend their lifespan. Limescale flakes will no longer spoil your morning tea or coffee. The filter also reduces organic substances and bothersome odours or flavours.

The result: the BLANCO Smart mixer tap transforms standard mains water into deliciously soft, fresh, running drinking water of the very highest quality. Simply delicious.

But it’s not just delicious and healthy. It also saves you from having to drag boxes of water around the place. What’s more, you can help the environment by no longer needing to use plastic bottles. Simply smart.

To ensure that you always change the filter at exactly the right time, the BLANCO Flowmeter is built into the water pipe for the filter and measures precisely how much water is actually flowing through the filter. Depending on the hardness of your water, the Flowmeter will show the filter’s exact remaining capacity. That way, you can be sure that you are getting the best out of the filter.

If the filter needs to be changed, the Flowmeter will warn you in good time by sounding a signal. It also gives you a warning if its batteries need to be changed. This gives you complete peace of mind when getting boiling water. The Flowmeter automatically lets you know if the system needs something.
The **fine particle filter** disposes of the finest particles and suspended sediments.

The **mains water** undergoes a repeated process of filtering and purification to become optimised drinking water.

The **activated carbon fleece** reduces the chlorine content and eliminates irritating odours and flavours.

The **high-performance ion exchanger** has the job of ensuring a balanced mineral content. Limescale is reduced and the water is softened.

The **activated carbon filter** reduces organic matter and ensures the safety and longevity of the filtering system.

The **particle pre-filter** catches coarse particles like sand and rust.

Fresh, delicious drinking water to savour.
Freshly drawn.  
Freshly poured.  
Fresh enjoyment.
Everyone is familiar with the situation of having both hands full in the kitchen, whether you’re mixing ingredients for a birthday cake or marinating the Sunday roast. And it’s just then that you need some water.

The SOLENTA-S Senso from BLANCO has just the smart system to help, and is setting a new benchmark with its innovative sensor technology and start-stop function. The intelligent motion sensor activates and deactivates the water flow completely touchless, as if by magic.

The rotating sensor is integrated into the spout arm, giving it a whole new functionality. Meanwhile, the optimal trigger range around the sensor prevents it from being activated unintentionally. This ensures convenient operation, with only a gentle movement required to get the water running, whenever you need it. The blue LED display in the spout arm shows the operating mode. A permanent light indicates stand-by status. If the water is being controlled by the sensor, it flashes.

The flexible hose with its magnetic holder allows you to expand the range of action around the sink with ease. The segmented metal casing prevents any build-up of dirt. In addition, the SOLENTA-S Senso has a top-quality dual spray hose with a switchover function.

And on top of all these plus points, this classy smart mixer tap also saves water. And that means cost savings, too. Plenty of reasons to celebrate, even if you have your hands full.
Full hands. Running water. An inspired idea.

Touchless water: SOLENTA-S Senso combines a start-stop function with sensor technology.
The sensor is optimally accessible. It turns to wherever you want the water to flow.

The sensor’s near field detection function responds to any movement within an ergonomically optimal distance of up to 6 cm.

The dual spray hose gives you the choice of a jet spray for washing remnants of food off your dishes, or a wide spray for filling pots.
Water on. Water off. Touchless.

Of course, you can also use the lever to regulate the temperature manually and leave the water running.

The stainless finish UltraResist is particularly easy to clean and scratch-resistant, and does not show fingerprints.
Impressively ergonomic.
Strikingly efficient.
Inspiringly innovative.
Cooking can be a sheer delight. Preparing dishes within the perfect workspace makes it even more of a pleasure. Spare yourself lots of extra work by getting the water to flow without having to touch anything, thanks to the SOLENTA-S Senso with its innovative start-stop function. There’s no need to change hands, put things down or set what you’re doing to one side. Instead, you can give your full attention to the essentials. Last but not least, this Smart mixer tap is a feast for the eyes.

In the past, everyday kitchen tasks would sometimes leave you wishing you had an extra hand. Today you just need the SOLENTA-S Senso.

Water cleans your dirty hands. But who cleans the mixer tap? Thanks to the touchless water flow, it’s no longer necessary.

Water is precious. You can start and stop it with complete ease – simply wave your hand.

The start-stop function with touchless sensor technology means that you can now prepare meals much more ergonomically and efficiently.
Good idea. Smart mixer tap. Perfect kitchen.
